FALL FOCUS ON BOOKS

SPECIAL BOOK ARTICLE

- 1019 Race: The Problem That Won't Go Away**
 Kenneth M. Weiss and Anne V. Buchanan

Race Unmasked: Biology and Race in the 20th Century
 by Michael Yudell

The Myth of Race: The Troubling Persistence of an Unscientific Idea by Robert Wald Sussman

SPECIAL BOOK ARTICLE

- 1021 Ecology and Statistics: A Healthy Union?**
 Megan D. Higgs

Ecological Statistics: Contemporary Theory and Application
 by Gordon A. Fox, Simoneta Negrete-Yankelevich, Vinicio J. Sosa, eds.

The New Statistics with R: An Introduction for Biologists
 by Andy Hector

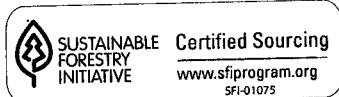

Scavenging is fundamental to comprehensively understanding the structure and functioning of natural communities, in which carrion is a ubiquitous and high-quality food resource widely exploited not only by obligate scavengers (e.g., vultures) but also by a plethora of facultative or opportunistic scavengers. An article in this issue by Marcos Moleón and José A. Sánchez-Zapata discusses teaching about scavenging in ecological pedagogy. Photographs: Marcos Moleón (white rhino carcass) and David Carmona-López (the rest).
