Journal of Biosciences

Vol. 40, No. 4, October 2015

CONTENTS

Preface
Sanghamitra Bandyopadhyay and Rajat K De 667–669

Articles

pubmed.mineR: An R package with text-mining algorithms to analyse PubMed abstracts
Jyoti Rani, Ab Rauf Shah and Srinivasan Ramachandran 671–682

Analysis of core–periphery organization in protein contact networks reveals groups of structurally and functionally critical residues
Arnold Emerson Isaac and Sitabhra Sinha 683–699

MIPCE: An MI-based protein complex extraction technique
Priyakshi Mahanta, Dhruba Kr Bhattacharyya and Ashish Ghosh 701–708

DNA pattern recognition using canonical correlation algorithm
BK Sarkar and Chiranjib Chakraborty 709–719

Feature selection using feature dissimilarity measure and density-based clustering: Application to biological data
Debarka Sengupta, Indranil Aich and Sanghamitra Bandyopadhyay 721–730

Semi-supervised prediction of gene regulatory networks using machine learning algorithms
Nihir Patel and Jason TL Wang 731–740

Identification of certain cancer-mediating genes using Gaussian fuzzy cluster validity index
Anupam Ghosh and Rajat K De 741–754

Graph-based unsupervised feature selection and multiview clustering for microarray data
Tripti Swarnkar and Pabitra Mitra 755–767

Temporal protein expression pattern in intracellular signalling cascade during T-cell activation: A computational study
Piyali Ganguli, Saikat Chowdhury, Rupa Bhowmick and Ram Rup Sarkar 769–789

Knowledge-based analysis of functional impacts of mutations in microRNA seed regions
Anindya Bhattacharya and Yan Cui 791–798

Phylogeny of metabolic networks: A spectral graph theoretical approach
Krishanu Deyasi, Anirban Banerjee and Bony Deb 799–808

Protein–Protein interaction site prediction in *Homo sapiens* and *E. coli* using an interaction-affinity based membership function in fuzzy SVM
Brijesh Kumar Sriwastava, Subhadip Basu and Ujjwal Maulik 809–818

Flux balance analysis of genome-scale metabolic model of rice (*Oryza sativa*): Aiming to increase biomass
Rahul Shaw and Sudip Kundu 819–828
