

5.1.1. A range of capability building and skill enhancement initiatives are undertaken by the institution

Regional Institute of Education Bhubaneswar plays a pivotal role in nurturing holistic growth among individuals through a diverse array of capacity-building initiatives. The institute dedicates comprehensive spectrum of programs to foster personal and professional development. Being a residential institute the students get more personality development training not only in institute but also in hostels. Time to time personality development workshops aimed at enhancing self-awareness and confidence to soft skills training are arranged that forms communication, teamwork, and leadership abilities. These initiatives cater to the multifaceted needs of the learners. Moreover, stress management programs provide invaluable tools and techniques to cope with challenges, ensuring mental well-being amidst academic and personal pressures. By embracing such multifaceted approaches, these institutes empower individuals to thrive not only academically but also in their personal and professional spheres, nurturing well-rounded and resilient individuals ready to navigate the complexities of life. Beyond there, health and nutrition workshops educate on maintaining a balanced lifestyle, emphasizing the correlation between good health and effective learning. Hygiene sessions impart essential practices for personal and environmental cleanliness, nurturing a culture of wellness. By integrating these diverse initiatives, Regional Institutes of Education, Bhubaneswar creates an ecosystem that not only supports academic growth but also nurtures all-rounded individuals equipped to thrive in various facets of life.

1. Career and Personal Counselling

- The Institute runs a Diploma course in Guidance and Counseling for both pre-service and in-service teachers. Trainee counselor of this course organize workshops and career exhibition to provide guidance and counseling to B.Sc.B.Ed and BA.B.Ed and M.Ed students and also to students of different schools.
- Voluntary counseling services to the needy students by the Alumni students of DCGC.
- Career orientation cum counseling for newly admitted students (B.Sc.B.Ed, B.A.B.Ed, M.Ed., M.Phil, Pre PhD, DCGC) held every year at the beginning of academic session.
- Personal counseling and guidance are also provided to boarders of different hostels of the institute.
- Motivational programmes such as Yoga/health related issues that deal with mental relaxation and concentration are also carried out. Students and staff members do participate to have peaceful mind and body.
- Placement counseling is also provided by the placement cell of the Institute.
- A programme on school health and wellness issues was carried out for B.Ed and M.Ed students.

3. Communicating with persons of different disabilities : Braille, Sign language and Speech Training

Adequate facilities is available in the Institute and classroom for physically challenged students

- To enable easy access for the visually impaired students, Institute library uses the JAWS talking screen reader, Zoom text screen Magnifier and Clear Reader + Basic text reading machines.
- JAWS (Job Access with Speech) is a computer screen reader program for Microsoft Windows that allows blind and visually impaired users to read the screen either with a text- to speech output or by a refreshable Braille display.
- Many reading and reference books are available in the Library for facilitating teaching-learning of different disabled students.
- Faculty members encourage visual disabled learners to use screen reader in mobile for learning purpose.

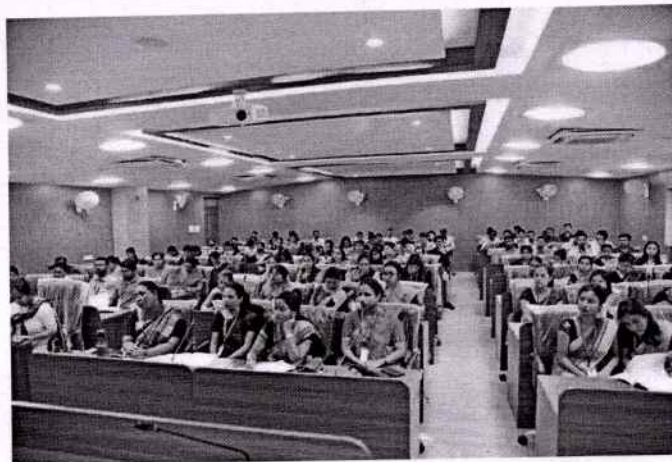

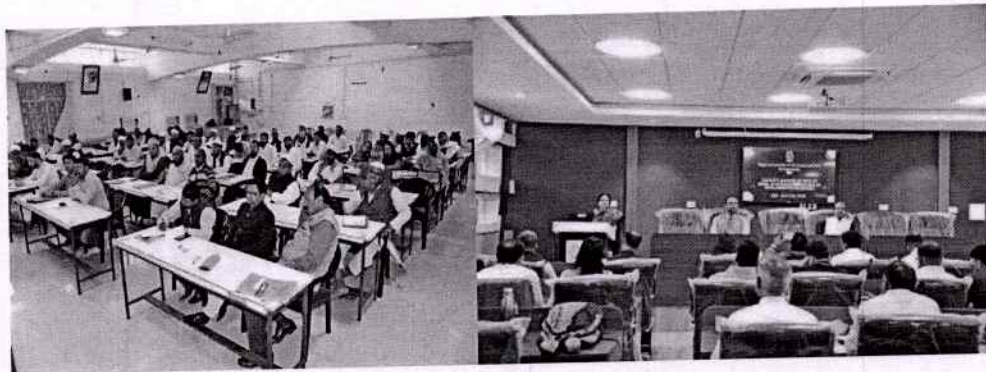

4. Capability to develop a seminar paper and a research paper; understand / appreciate the different between the two

All teacher education programmes such as B.Sc. B.Ed, B.A. B.Ed, B.Ed. and M.Ed etc. have compulsory requirement of research activity and seminar presentation.

From the beginning of the academic session, faculty members help the students to understand seminar paper, research paper and review paper. Then the students are allowed to select the topic, carry out – the research work and form a report. The thesis is evaluated with help of external examiners and a seminar paper/ research report is submitted based on the dissertation work.

- B.Sc.B.Ed and B.A.B.Ed programmes provide opportunities to carry out research based project at the final semester. The project thesis carries 100 marks.
- 2 year M.Ed programme has dissertation activity that carries 200 marks.
- Students do submit paper in different conferences/ workshops organized by different organizations and departments. They also publish their papers in different journals.

SOCIAL MEDIA AND ACADEMIC PERFORMANCE OF STUDENTS AT GRADUATION LEVEL

*Rupa Gupta**

*Dr. Elizabeth Gangmei***

Abstract : *Social media is now a part of everyone's life. Social media provides a great platform for any individual for accessing and communicating the information worldwide at just one click. It has been observed that the younger generation is extremely much susceptible to social media. So, this study is an attempt to examine the extent of usage of social media and academic performance of students at graduation level. This empirical study is based on a survey of 187 students at the graduation level of Patna College of geography department. Data collected online, through Google form was analyzed through MS Excel and SPSS Software. The findings of the study revealed that (i) There is no significant difference in the usage of social media for academic purposes on the basis of gender (male and female) students of graduation level. (ii) There is no significant difference in the usage of social media for academic purposes by the graduation level students belonging to different areas (urban, rural, and semi-urban set-up). (iii) There is no significant difference in the usage of social media for academic purposes by the graduation level students studying at different levels (1st year, 2nd year, and 3rd year).*

Key Words: *Social media, Academic performance, Graduation level students.*

Abstract

The phrase "new normal" has become a cliché. The COVID-19 pandemic has drawn our attention to numerous alternative methods of teaching, hitherto unknown and unexplored. Educational institutions have pushed their boundaries to ensure that teaching-learning continues despite the constraints of the COVID-19 pandemic. Online teaching has proved beneficial to both educational institutions as well as students. The present paper is an effort to find the availability of ICT resources, perception, skills of students, and the challenges faced by students while attending online classes. A quantitative descriptive survey method was used for the purpose of this study. The sample consisted of 360 High School Students i.e., 20 students each from classes VII, VIII, and IX from 6 Jamshedpur Industrial City Schools - 3 English and 3 Hindi Medium schools purposefully. The findings of the study revealed that the maximum number of the respondents had a smartphone (94%) followed by the availability of an internet connection (40%), whereas 25% of students cited that a laptop is available for use in their home. The study reveals that the face to face learning is preferred mode of learning for social presence, social interaction, and satisfaction; but, in contrast, online mode is a choice during Covid-19 on account of safety and security of lives. Meanwhile, statistically it is found that Hindi Medium School students have more favorable perception towards online learning than English Medium School Students. The study concludes that online teaching-learning is the best possible way to sustain academic activities during Covid-19.

Keywords: Online Classes, High School Students, Covid-19 pandemic

Introduction

The demands of the contemporary educational system are very different from what they were in the past. With the continual development of technology, educational institutions are now employing online education which gained momentum and made inroads into our education system. The fusion of digital technologies and the development of the Internet have prompted a change in education methodologies. Online learning is basically a form of electronic learning which delivers education through the internet instead of a conventional classroom. One of the vital shifts in education is the resultant largest "online movement" in the history of education. This and other ensuing changes allow us a glimpse into the future of education with many experts predicting it will be a new normal in learning (Chung, Subramaniam & Dass, 2020). Online learning has grown at an incredible rate due to

Introduction

The serenity and ambience of Nature has never ceased to amaze us. Mother Nature nurtures the feather of dominion over mankind that is tethered in her crown of supremacy. The most attractive things that grab our attention of eyes are the ones that are the most symmetrical or follow a certain geometrical pattern. Nature is replete with such exquisiteness- whether trees, flowers, seeds, vegetables, fruits and so on. Scientists are still searching the exact connotation of symmetry in living organisms. The panoramic Nature around us seems to be totally a myriad of various patterns and geometrical aspects. Years ago, the concept of Golden ratio (Phi) was established in order to pacify the various doubts regarding the beauty and patterns of the things that we see around us. The interesting thing about mathematical concepts is that we can trace their development or discoveries throughout history. Most cultures of the ancient world had some form of mathematics, and these basic skills developed into what we now call modern mathematics. The Golden ratio is similar in that it was used in many different sections of history. The Golden ratio, sometimes called the divine ratio or golden section, has been found in very diverse areas. The mathematical concepts of the golden ratio have been found throughout nature, in architecture, music as well as in art. Phi is an astonishing number because it has inspired thinkers in many disciplines, more-so than any other number has in the history of mathematics.

Golden ratio

In mathematics and arts, two quantities are in the golden ratio if the ratio between the sum of those quantities and the larger one is the same as the ratio between the larger one and the smaller. The golden section is a line segment divided according to the golden ratio. Suppose a line is broken into two pieces, one

Introduction: Hydrocarbons are products of many plant species belonging to different families that possess substantial amount of essential oils. Petroleum plants are the families like Euphorbia, Apocynaceae, Asteraceae, Solanaceae, Umbelliferae and Compositaceae. Many of these plants contain liquid form of hydrocarbons which is the essential oil. These hydrocarbons are used in many ways. They are also used in many industries. These plants are used in many ways. They are also used in many industries.

All these plants contain hydrocarbons in the form of latex. A milky or colored juice called latex is found in the petroleum plants.

List of some common Petroleum plants:

Plant Family	Botanical Name
Euphorbiaceae	Hevea brasiliensis
	Dialium zeylanicum
	Euphorbia resinifera
	Euphorbia tirucalli
Anacardiaceae	Calophyllum procumbens
	Asiaticum latifolium
Asteraceae	Parthenium argentatum
	Taraxacum kok-saghyz
Apocynaceae	Landolphia kandelaki
	Landolphia incisa
	Madhwickia pinnata

Using SIR Model and Recurrence Formula to Predict the Spread of COVID-19 in Sambalpur: A Mathematical Study

S. Kapoor and Roushnee Naik*

Abstract

Corona Virus has spread across the globe and is creating havoc. Lockdown is being imposed worldwide depending on the number of cases. Everyone are advised to wear masks, follow social distancing, and use hand sanitizers to keep them safe. But all these precautions are not enough to curb the spread of the disease. People are still getting infected even after taking proper precautions and obeying the lockdown rule. We need to know in advance the approximate number of infected people so that we can devise better precautionary measures to curb the spread of the virus. So we use a simple SIR Model and solve it using basic differentiation and integration techniques and then use recurrence formula approach to predict the spread of COVID-19 in the city of Sambalpur of Odisha state. We compare the outcome of the model with the real time data and we arrive at the conclusion that the model is efficient in predicting the spread using the recurrence formula till the date 05/06/2021.

Keywords: COVID-19, SIR Model, recurrence formula, spread.

5. E-content development

- The Institute has a well developed ICT Studio with Camera, i-Mac, software for audio and video editing and Network Attached Storage (NAS). This is used for creating E-Content for school and teacher education and organizing live programmes by students and faculty members.
- During Covid-19 pandemic, many of our academic staff members used PM- E Vidya and Swayamprabha platform & prepared E- contents. These presentations were prepared for teaching science, social science and language for students. Besides these, our students have also developed a number of E-content materials for their internship programmes. These are uploaded in YouTube and stored in our network attached storage of ICT department.

> Creating Inclusive School - B.Ed.

The course on Creating Inclusive Schools for B.Ed. programme purports to develop understanding and skills for the inclusion of all children in the schooling process for imparting quality education.

> Childhood and Growing Up - B.Ed.

This course gives prospective teachers an understanding of human growth and development.

The child is the core of every teaching-learning situation, and understanding the child intimately from all perspectives is what a teacher should aspire to. To

Class comments

40 S Rudrani Nalk Feb 9, 2021
It's showing the physical development of the child. By 1 year reach, they can pass object from hand to hand and try to self feeding with fingers and can sit up unsupported.

AMRITA KUMARI MISHRA Feb 9, 2021
It's showing the newly developing ability of mental coordination with physical work...the girl has thought to eat the pomegranate seeds and so she is trying to pick them up...even though she is not able to pick them properly she is trying again and again with her total concentration on the bowl Also the girl is following the instruction that her mother is saying...so she is at a phase of life where children try to do things that are told to them without thinking so here it becomes prime duty of the teachers that they teach or instruct the kids the right actions and habits.

Sohini Ray Feb 9, 2021
The child is exhibiting psychomotor development. She is also listening to her mother, understanding it, and working accordingly while moving the bowl. This shows her mental development is also enhancing.

Astha Jaideep Feb 9, 2021
The child in this video is using FINE motor skills (using smaller muscles for little things). As we can see she is holding pomegranate seeds in her fist where she is using her fingers and thumbs to hold her food. She is sitting without leaning on anything or being held up. We can also depict that she is hungry and now she knows that when she'll eat her hunger will be satisfied.

53-S TAPASWANI SIAL Feb 9, 2021
This is the infancy stage of a baby nearly about 1 year, she is trying to eat pomegranate seeds in a cup and the fallen seeds was not allowed to be wasted. It shows both her mobility and mental improvement. Her slow motor development is going well. She focuses only on the seeds and not in the mood to listen to the other. Here the teacher can easily describe the growth and development that occurring in a baby in her infancy stage by taking it as an example.

10-Sc:- Ankita Singh Feb 9, 2021
This child is exhibiting physical development and psychomotor development. We can say physical development because she can move the bowl, trying to eat by her own and psychomotor development because she is also listening to her mother and her mental development is also going on.

PRITI KARMAKAR Feb 9, 2021
In my view all the development are taking place as:-

- 1) She is picking up the pomegranate seeds and also moving the plate from one place to other. Here physical development is taking place where Fine motor skills are applying i.e, moving of Fingers, hands.
- 2) As the pomegranate seed is thrown out of the plate. Her brain signals her to pick the Pomegranate seed and put it into the plate. This is Cognitive Development as she learning to use her brain.
- 3) The girl is putting the plate in the direction she wants but when her mother said to put the plate
